 It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: It was suggested to applicant to define "aw" and express the "aw" in parenthesis. Brief mention was made to the fact of having "retinoic acid derivative" in claim 23. However, because retinoic acid derivatives are the compounds named in paragraphs [0027]-[0038], the retinoic acid derivatives in claim 25 are defined by those compounds. Also on 5/10/2010, it was agreed to use Markush language to list the hyperproliferative disorders.
